

BEN ACADEMY (The place to train your brain)

ORGANIC CHEMISTRY EQUATIONS MADE SIMPLE

COURSE DESIGNER

JOHN LOUIS
GRAND MASTER OF MEMORY
INTERNATIONAL MEMORY TRAINER
TEACHER

John Louis is a GRAND MASTER of MEMORY and the first Indian to achieve the title and has several Indian National records on memory. He is also a professional International Memory Trainer and an expert teacher in chemistry and has 17 years of experience in teaching chemistry equations integrating memory techniques with learning and remembering chemistry equations. He has also conducted many ORGANIC CHEMISTRY EQUATIONS MADE SIMPLE program in India and Saudi Arabia. He has also started conducting it in Singapore.

He has appeared in SUN TV which telecast in 130 countries and ZEE TV which is one of another top TV channels in India to exhibit his memory skills that can be imparted to anyone by training.

BENEFITS

Organic chemistry is one of the easiest subjects to learn upto the senior secondary school level provided you know how to learn and remember (memory techniques), the basics of organic chemistry and its fundamentals and how to integrate the memory techniques with the subject. But, on the contrary, it is a dreadful subject for many students.

Hence, this program is specially designed to make organic chemistry learning as fun, in association with memory techniques and to score high marks in chemistry. The techniques applied here will also motivate the students to think creatively and apply them in the other subjects as well.

TESTIMONIALS

Excellent program. Well designed and organized. I thoroughly enjoyed and benefited and scored 199 out of 200 marks.

[D. Senthil Nath : India](#)

I was very poor in organic chemistry. I never passed before attending this program. I scored 71 %

[Kevin Dzousa : India](#)

This program not only taught me how to learn organic chemistry but also taught me how simple and enjoyable learning is, if approached methodically. I scored 195 out of 200 marks.

[Aarif Mohammed : India](#)

COURSE CONTENT

Introduction

- Memory demo of a trained memory
- Memory techniques required to learn chemistry

Basics of organic chemistry

- Elements in organic compounds and their symbols and valences
- Types of organic compounds and how to learn and remember them
- Functional groups
- How to write the formula of a compound (IUPAC RULES)
- How to write the name of a compound
- Types of reactions

Secrets of learning and remembering the organic chemistry equations

- Types of reactions
- Recognizing the type of a reaction
- Learning to identify the products
- Writing the equations
- Applying the memory techniques remember the equations

WORK DETAILS

- Duration – 5 days / 10 hours (2 hours a day) for +1 and +2 students in India
- Duration - 2 days / 4 hours (2hours a day) for 9th and 10th students in India
- Duration - 2 days / 4 hours (2hours a day) for S3, S4 students in Singapore
- Schedule – [click here](#)
- Workshop material will be provided

BENEFICIARIES

- Students of age 14 to 17 in India (std 9th to 12th)
- Students of age 14 to 15 in Singapore (S3, S4)

CUSTOMIZED PACKAGES

Ben Academy also provides customized packages of ORGANIC CHEMISTRY EQUATIONS MADE SIMPLE to suit different age, different class of students according to varied syllabus in their school in different countries.
